WALKER TEXTURES®

BIRD FRIENDLY BUILDING DESIGN WITH ACID-ETCHED GLASS

Walker Glass is proud to offer architects and specifiers this Continuing Education Course approved by the AIA and the USGBC. The purpose of this presentation is to provide in-depth knowledge of acid-etched glass solutions in bird friendly building design. The most up to date and detailed information will be given to help understand how the risk of bird collision against building facades can be significantly reduced with appropriate acid-etched glass solutions.

Program number: WA1311
Duration: 1 hour, LU-HSW & GBCI CE

BIRD FRIENDLY BUILDING DESIGN WITH ACID-ETCHED GLASS

PROGRAM OUTLINE

Importance of Birds

Importance of Bird Conservation

Assessing The Risk of Bird Collisions

Research On Bird-window Collisions

Testing Methods

Definition of Bird Safe Façade

Recognized Metric: Threat Factor

LEED Pilot Credit 55: Bird Collision Deterrence

Most Popular Bird Friendly Glazing Materials

Acid-etched Glass vs. Other Options

Other Bird Friendly Glazing Options

Bird Friendly Acid-etched Glass Specifications

Acid-etched Glass Applications

Bird Safe Glazing Standards and Guidelines

Future Evolution
